(701) 629-1912  
dfeiring6@gmail.com

## *Dear Friends,*

---

We would like to invite you to our 30th Annual sale (online) April 18-20th, 2024. Thank you to our many friends, loyal customers & interest in our program. You are welcome to come view the offer at your convenience, or open house the day of closing online sale. We'd also be happy to show you our cows, herd bulls and how we manage our cattle.

We've tried popular/trending genetics, but they did not work very well for us! Sure, we could have changed our management practices to make them work. I'm old school and believe that cows must work for us. I believe a cow must live and work in the environment and resources that ranch has in a low input operation. Feed, fuel, labor, & equipment all cost more than in the past. We do not run a feed wagon, bale processor, or use corn silage. We feed hay when supplementing our cattle in winter. Mostly grass type hay. Summer is just mineral & salt. You must match your cow to your resources. Some seed-stock operations are showing that you can wean calves up to 1,000 pounds! Yes, it might be possible with high growth genetics, and by altering your environment with supplement feeding. Sadly, most commercial cattle are unprofitable feeding supplements 365 days a year! You must match your cow to your environment and lowest cost resources! The easiest way I can explain this is like driving a car with bad gasoline in the tank. When mother nature is treating you good, and you're driving that car with bad gasoline downhill you might get by. But when mother nature throws you a drought and your high growth genetics energy requirements are not met, there will be more open cows and lighter weaning weights. And driving that car with bad gasoline uphill it will not make to the top! Very simple, do not be pulled down that rabbit hole, with all those marketing & potsy schemes telling you that all that growth is a good thing. High growth genetics maintains requirements are higher 365 days a year than moderate growth cattle are. We used to call them range cows, now maybe feedlot cows are more fitting!

We look forward to seeing or hearing from you. If you are uncomfortable with the online sale format, be sure to contact us or Bill Pelton's staff, we will be more than happy to assist you. Let's make Americans cow herds great again!

God Bless!

Doug & Ceylon Feiring Family

**SATURDAY, APRIL 20<sup>th</sup>, 2024 @ 1:00 PM CST**

**Prebidding opens April 18<sup>th</sup>  
Auction Closes @ 1:00 PM CST  
April 20<sup>th</sup>**

**ONLINE INTERNET AUCTION BY  
PELTON LIVESTOCK  
[HTTPS://BID.BILLPELTON.COM/](https://bid.billpelton.com/)**

*How This Sale Close Works*

The Feiring Angus online auction will close with horse race style bidding or extended bidding. This means that when the online auction event comes to its scheduled end time there will be 5 more minutes of extended bidding. If bidding continues the sale will stay open until there is a 5-minute stretch with no bidding on any lot. Once there is a full 5 minutes with no bidding on any lot, the whole event will close.

THIS AUCTION IS SCHEDULED TO CLOSE AT 1:00pm CST ON April 20<sup>th</sup>.

Example 1: The auction closes at 1pm and goes into extended bidding. If there are not bids on any lots between 1pm and 1:05pm, the whole sale is declared closed at 1:05pm.

Example 2: The auction is scheduled to close at 1pm and goes into extended bidding. There is a bid on a lot at 1:02pm. Every lot remains open to bids. If there are no bids on any lot by 1:07pm, the whole sale is declared closed at 1:07pm.

Example 3: The auction is scheduled to close at 1pm and goes into extended bidding. There is a bid on a lot at 1:02pm. Every lot remains open to bids. Another bid is placed at 1:06pm. Every lot remains open. Another bid is placed at 1:10pm. Every lot remains open. If there are not bids on any lot by 1:15pm, the whole auction is declared closed at 1:15pm.

*Is The Auction Platform Mobile Friendly?*

Yes, the auction platform and entire site is mobile friendly. So, no matter the device (computer, cell phone, tablet, etc.) you are utilizing to view and/or bid on an auction, the site is responsive to your screen, so you have the most optimum viewing and bidding experience.

*Creating an Account with Pelton Livestock Online Auctions*

Only registered bidders over the age of 18 can participate in Pelton Livestock Online Auctions. To register, select the Login/Register link on the right top side of the screen in the navigation bar. Register for a new account by entering your contact information, email address, desired password, etc. Once you submit the auction registration form, an email will be sent to the email account provided. Please click the link in that email to activate your account. Prior to Prebidding opening day, view auction and click "request to bid" on any lot to be approved for bidding. Request will be sent to Seller and once approved, you will be notified that you can now bid live for that auction. Please keep your user information (email address and password) in a secure place as you can use the same account login for all online auctions hosted by Pelton Livestock. If you have any questions or need assistance with creating an account or bidding, please call PELTON LIVESTOCK Darci Sachdeva at 406-794-3174.

*Buyer FAQ*

Please read Buyer FAQ on the upper right-hand side of the screen in the navigation/menu bar to learn how to bid, use watch lists, maximum bids and more.

*Auction Demo Available*

Login with credentials provided at registration and enter "Demo Auction" to practice bidding. For help call Darci Pelton Sachdeva at 406-794-3174

other accommodations in Williston, New Town, and Minot, ND. Please call if you need assistance.	

## *Inspection of Cattle*

Sale cattle are available for inspection at Feiring Angus or Ramberg's Ranch. Please call ahead of time to set up a viewing.

## *Terms & Conditions*

All cattle must be paid for in full before taking possession by buyer, or if other arranged payments have been agreed on by both parties.

## *Health*

Health and brand papers will be furnished. All cattle have been vaccinated for IBR, Pi3, BVD, Pasturella Haemophilus Somnus, and poured with Vetricmec. All females have been bangs vaccinated for Brucellosis and will be vaccinated with PregGaurd FP 10 before the sale. All bulls have been vaccinated with Fusogard (footrot vaccine) so their ready to work for you.

## *Insurance*

Insurance will be available through Bill Pelton.

## *Announcements*

Announcements before the sale will take precedence over information in this catalog.

## *Delivery*

\$50.00 off per bull picked up the following week of the sale. Or free delivery on bull(s) within a 200 mile radius. Heifers will be at the expense of the buyer. Prompt pickup is appreciated. Feiring heifers will be at their ranch & Ramberg heifers will be at their ranch. We will help find transportation if requested.

## *Feeding Arrangements*

We can board your bull(s) until you need them. There will be a \$2.50 per head/per day charge with this service. You will be responsible for picking up the bull(s) at Feiring's ranch, unless prior arrangements have been made.

## *Our Guarantee*

To our knowledge, these bulls are fertile and have passed a breeding soundness exam and are guaranteed for the first breeding season (60 days). Which begins when you turn our the bull(s). The semen test conducted by a licensed veterinarian consisted of both an internal and external exam. Scores were derived from scrotal measurement and microscope examination to determine the motility and morphology of the sperm.

If a bull fails to settle cows or heifers, assuming he is in good condition and not injured, we will provide you with a satisfactory replacement if available. If a replacement is not available, we will issue you credit equal to your purchase price minus the salvage value that may be used towards the purchase of an animal for sale through our annual production sale or private treaty. We must be notified immediately and before selling the infertile bull in question. We also reserve the right to a second opinion from a veterinarian of our choice, and 60 days to determine if the bull is infertile. This guarantee is to ensure the bull's fertility only.

## *Liability*

Everyone coming to Feiring's or Ramberg's ranches does so at his or her own risk. Neither party assumes any liability, legal responsibility for any accidents, or for the behavior of the animals.

## *Retaining Interest*

Feiring Angus Ranch is retaining one-third revenue sharing semen interest in every bull selling in this sale. Full possession and full salvage value sells on all bulls. Unless stated otherwise. We also reserve the right to collect semen on any bull selling in this sale, at your convenience and our expense, to be used in our herd only.

## *Sale Videos*

Videos will be available for viewing at [www.billpelton.com](http://www.billpelton.com) under Feiring Angus Sale Info.

## *Bull Development*

Weaned 12/6/23 on free-choice grass/alfalfa hay, and FeedMix 14 calf grower pellets in creep-feeders. Had them put more fiber in then their regular 14 calf grower. Mid March started hand feeding them 10 pounds per head a day. Developed with soundness fertility & longevity in mind. 3 year foot guarantee. The gain printed in catalog is a 110 day gain from the day of weanig, so is a comprehensive gain. Meaning the fill of the bulls weight when weighed could reflect their gain posted.

# AgBoost®

## WHO AND WHAT IS AgBOOST:

AgBoost is an independent genetic data company that processes your DNA through Igenity, which is a non-breed specific third-party DNA lab. The data comes back to AgBoost in a 16 trait genetic profile. These 16 traits are the core of what most cattlemen need to help make a more targeted selection for their sire needs. From these 16 traits, there are four target areas that you can see more specifically how the individual performed compared to others. Those areas are Production, Maternal, Performance, and Carcass Traits.

## CHOICE:

As the industry leans more towards being data-driven, we were looking for a company that would give us a non-biased DNA evaluation. I was looking around for another breeder that was doing what we were trying to accomplish. That is when I found Craig Guffey of Swearingin Angus by Lawrence, KS. Why did we choose AG Boost over Angus Genomics? Quite simply we were looking for a non-biased 3rd party evaluation of what our cattle are. Another feature is the simplicity at which data is presented. It is easy for anyone to understand and use for their selection needs.

## BULL SALE INFO:

AgBoost identifies 16 traits and applies a score from 1-10, with 1 being the lowest and 10 being the highest score, against all breeds today. A higher score is generally better, unless you want less BW, FAT and RFI, then you would want a lower score. The DNA test is done at IGENITY (Neogen Geenseek Operations) Lab, and AgBoost is the 3<sup>rd</sup> party source. We are excited and will continue to use AgBoost. I will still provide actual data that we have taken from these bulls. This is calculated off the true genetic value based on all breeds, not a subset of Angus. The most important thing to understand is we have kept all traits balanced to allow performance, efficiency, and long-term maternal value.

# Commercial Heifer Offering

- Heifers are weighed and listed in lots of 5 in each group, the heaviest heifers would be in the first groups and the lighter heifers will be in the last groups of 5 head.
  - Groups are defined as Feiring Black Angus and Ramberg Black Angus & BWF.
- If you would like buy 20 heifers for a example, you would have to buy 4 lots of 5 head to = 20 head.
  - Lots of 5 weights and herd ID numbers will be posted and available prior to Sale.
    - Each heifer has a herd tag # and a freeze brand # that match.
    - Feeding and care arrangements are a possibility if needed till turn out.
- Feiring heifers will be at Feiring's Ranch & Ramberg heifers will be at Ramberg's Ranch south of White Earth.  
If you have any questions or need more info, please contact  
**Doug Feiring at 702-629-1912 or Chuck Ramberg at 701-629-1501**

## 50 Commercial Heifers

- 50 Black Angus Heifers  
Feiring Angus Ranch 701-629-1912
  - Born mid April 2023 through June 1, 2023
  - Sired by Feiring reference sires listed in catalog
  - Bangs vaccinated PregGuard & Freeze Branded
    - Outstanding brood cow prospects
      - Weaned 12/6/2023
- Feed: free choice grass/alfalfa hay, 3 pounds wheat midds, protien & mineral supplement.

***We all like to pick cattle when in reality laws of nature do the picking and sorted on our ranches over the years! A wise breeder once stated "If we can't pick the heifer from the group who will be the most fertile, productive, and have longevity. Then why do we think we can pick the best young bull? Nature does the best sorting/not humans!"***

## 30 Commercial Heifers

- 20 Black Angus Heifers & 10 Black White Face Heifers  
Chuck & Roberta Ramberg and Family  
701-755-3419 or 701-629-1501
  - Born late March 2023 through May 2023
- Sires from Feiring Angus Ranch, Spickler Ranch, Schiefelbein Farms, & Holden Hereford Ranch
  - Bangs vaccinated, PregGuard, & freeze branded
    - Outstanding brood cow prospects
      - Weaned on alfalfa/grass hay

# The Angus Cow

**The Angus cow. The Angus breed's position as the number one beef breed in the world was built on the back of the Angus cow. She was reliable, productive, predictable, and built for the environment she inhabited. That Angus cow was fertile, functional, and possessed a maternal instinct and intelligence that bordered on mythical. In the hills of California, the northern plains of Montana and the Dakotas, the arid Southwest, the corn belt of the Midwest and the hot, humid Southeast, that Angus cow went about her business of keeping countless ranches in the black.**

**The Angus cow began to change with the consolidation of the packing industry and the growth of the grid-based marketing taking place over the last twenty-five years. During the same time span, industry experts began proclaiming that we must add more marbling, more growth, and basically more everything. Genetic trend in the beef cattle business became driven by theory developed in the board rooms of the packing houses and in the class rooms of the universities. Breeding programs began taking clues from sales reports, semen companies, and marketers intent on creating constant churn.**

**At first changes were subtle. Today, it's painfully obvious that the pursuit of more carcass merit and growth came at the expense of the attributes that made the Angus cow the most efficient factory in the business. Untimely, those paying the steepest price for the conversion are the ranchers whose livelihoods depend solely on efficiently raising cattle in our nation's harshest environments. These ranchers have seen their margins lessen and inputs increase with every calf crop. That Angus cow which was their most valuable asset twenty-five years ago has become one of their costliest liabilities today. That Angus cow has gotten too big for her environment, failing to breed on time. Her calf has more genetic potential for weaning growth that can be realized in most real-world ranch's environment. That Angus cow is often poor footed, poor uddered and requires supervision at calving time. The maternal instinct and intelligence which was a trademark of that Angus cow has been replaced by an instinct to run for the feed truck when the going gets tough.**
