

Ice Man

History-The owner wanted to use him for pleasure, competition and working cattle.

He had behavior issues- spooking, bucking, blowing up, saddling issues, etc.

We worked with the relaxation techniques. Iceman settled right into the work.

Trauma release was done. Pain was likely a contributing factor in some of the behavior issues. With the work and ongoing training, progress was made.

The owner worked with ongoing training and reported good results. Ice Man is in training for working cattle, barrels and skjoring.

The owner comments that, 'He has come so far...from spooky and bucking to pulling kids in sleds...'
