Quality Red Angus Cattle Bred to Function Efficiently

Annual Bull Sale

Saturday, March 18, 2023 At the Ranch • Plevna, MT • 1 p.m. MDT

Selling 93 **Yearling Red Angus Bulls**

Bulls can be viewed at Eric Bowman's feedlot. 1 mile south of Rhame, ND, until three days prior to the sale.

Catalog & video available online March 1 at www.milkcreekreds.com

Welcome

Welcome to our offering of Red Angus genetics that have been developed over the past 38 years since we started in the Red Angus business. Thank you for taking the time to view the information that we have provided in hopes that it will give you the information needed to better inform you about the animals in this offering as well as our program as a whole. Our hope is that our customers can find us open to share all segments of our operation including who we are as a family and that we can understand the needs of our customers well enough to develop lasting relationships that go beyond the cattle industry.

We have arranged this offering of bulls so that they will sell in catalog order. We begin by sorting two high performance pens of bulls with one pen made up of heifer bulls and the other pen containing cow bulls. After that, we try to keep this process simple on our part, so we sort bulls into pens by sire groups and then develop a sale order within each pen which is based on the animals individual ID with a few exceptions. Through this process you will be able to find good bulls throughout this offering and the best bulls might not be at the front end of the sale.

We have added Ridge Oak Canyon 0072, 5L Foreman 04H, Ridge True North 0089 to our bull battery to offer some different genetics to our customers. We once again are offering sons of Ridge Admiral 3411, 5L The Real Deal 143B, RED Minburn Copenhagen 3Y, and Mlk Crk Fusion 5202. We feel that these sires fit into our breeding philosophy and and are being tested here in large contemporary groups.

We continue to have the bulls developed at Eric and Andrea Bowman's in Rhame, North Dakota. It has been a pleasure to work with this family for over 30 years when we started feeding with Eric's dad, Bruce. Now we get to watch Dillon, Olivia and Grayson (Eric and Andrea's children) becoming more involved with their operation. Eric feeds the bulls a TMR ration so that they should gain around 2.5 pounds per day. The bulls have two large lots along with a small pasture to get adequate exercise so they can develop for their future job of breeding cows and heifers.

We hope that the information provided within the pages of this catalog will be useful to you in evaluating our offering. If you have any questions about this information or need additional information please do not hesitate to contact us.

We always look forward to the opportunity to meeting people involved in this ranching life style as well as renewing friendships from the past.

May God Bless You,

Bruce, Tena, Jaclyn Ketchum and Jeff, Cele and Blaze Menees

As servants of the Lord, we are striving to be stewards of the land and cattle that He created and allowed us to manage so that we may glorify Him.

Milk Creek Reds Bull Sale

Saturday, March 18, 2023

1 p.m. MDT • Milk Creek Reds Ranch • Plevna, MT

Selling: 93 Yearling Red Angus Bulls

Sale Information

SALE DAY LUNCH:

Complimentary lunch and pie will be served at 11:30 a.m.

SALE LOCATION:

CATTLE VIEWING:

The bulls can be viewed at Bruce and Eric Bowman's feedlot 1 mile south of Rhame, N.D., until March 16th. After this time the bulls will be at the ranch.

SUPPLEMENTAL SHEET

Supplemental Sheet with Updated Carcass EPDs, Scrotal Measurements, Frame Score will be available online a few days before the sale and on sale day.

SALE VIDEO

The video of the sale cattle will be available to view by March 1, 2023 at www.milkcreekreds.com or www.dvauction.com. If you don't have high speed internet or are unable to view the video over the internet, contact us for a DVD on the sale cattle.

SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

Online bidding will take place on DVAuction. Go to www.dvauction.com.

PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders. If there are several people needing to use this method for the sale we will set up a conference call for you to call into during the sale. Please call a few days in advance if this is needed so that we may set this up and get you the necessary phone number and information ahead of sale time.

SALE CONTACTS:

Milk Creek Reds

Bruce and Tena Ketchum	406-778-3819 (Home)
	406-978-3819 (Cell)

DV Auction: Jay Rost	

AIR TRANSPORTATION

Billings, Mont	230 miles
Rapid City, S.D.	190 Miles
Bismark, N.D.	

LIABILITY

All persons who attend the sale or view the cattle do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents that occur on the sale or viewing premises.

ACCOMODATIONS:

Baker, Mont.

(If planning to stay please reserve early as the oil field activity can cause room shortages.)

TERMS

The terms of the sale are cash. All settlements will be made with clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on sale day take precedence over any statements printed in this catalog or advertisement.

DELIVERY

We will provide delivery up to 500 miles. Over 500 miles we will work with the buyer to make arrangements on delivery. A \$100 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale. Delivery of the bulls will start the week after the sale.

BULL HEALTH PROGRAM

The bulls received Vision 7 at branding and then were preconditioned in August with Bovishield Gold One Shot and Vision 7 Somnus. The bulls were boostered with Bovishield Gold in October. They received a Fusiguard injection in November and a booster in December. The bulls were drenched in November with Safe-Guard, poured with Clean-Up II in December and in January, Standguard in January and Clean-Up II in February. Semen evaluations were performed by Fallon County Vet Service prior to the sale and all the evaluation forms will be available sale day. Bulls that do not pass the semen evaluation will be available for sale after they have a satisfactory evaluation.

BULL DEVELOPMENT

The bulls are fed on a ration to develop them into sound functional useable bulls that will work in big country. They are fed to gain 2.5 lbs per day. The ration consists of ground corn (9.5 lbs), dry distiller's (1.75 lbs), corn silage (12.5 lbs), and the balance of chopped hay that consists of grass, alfalfa, oat hay(12.5 lbs). Along with a vitamin-mineral supplement. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lb gain. They have been developed at Bruce & Eric Bowman's feedlot which is located 1 mile south of Rhame, N.D.

SEMEN INTEREST

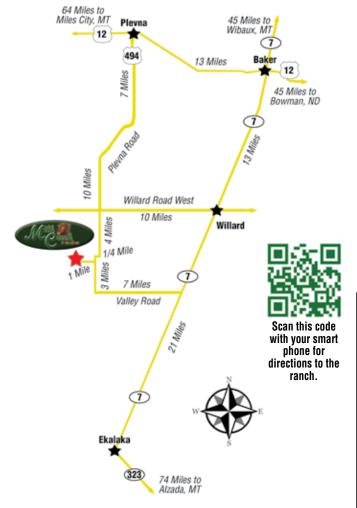

Milk Creek Reds is retaining one-half revenue-sharing semen interest in all bulls in the sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale.

Sale Information

WATCH AND BID ONLINE AT DVAUCTION.COM

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
- Complete the process by filling out the Banking & Lending information requested.

Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.

If you would prefer to be approved using your credit card, call (402) 474-5557.

Please be sure to apply for bidding at least a day in advance of the saleevery effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email support@dvauction. com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Mary Ketchum – 1941-2022

One important person will be missing at the sale this year, she always sat at the back and recorded the price of each bull, along with baking pies for everyone to enjoy.

Mary Ketchum lived the majority of her adult life on this ranch that we call home. She was married to Stanley Ketchum shortly after graduating from high school and moved to the ranch on the south fork of Milk Creek. At a young age she developed a strong work ethic and competitive spirit that she instilled in her two boys as well as many students that she worked with in the sport of rodeo. Most of her life she was faced with difficult challenges which she met head on. Her husband passed away unexpectedly when she was 36 years old leaving her the ranch with a huge debt and two young boys to raise. Many women would have not even attempted to accept this challenge but she didn't understand the concept of giving up. She was financially forced to sell all the cows but was able to keep a handful of bred heifers and heifer calves. She was able to take some cattle in on shares to help pay some bills as well. With only a high school education and living 30 miles from town, getting a town job didn't seem feasible to her so she began training barrel horses and students as a business. She also competed in barrel racing as a business to make money to keep food on the table and to keep from having to sell the ranch. She would usually have 2-3 outside horses along with 3-4 of her own raised horses in training at any given time. Throughout the summer months there would be a continuing rotation of girls and ladies that would travel to the ranch for 2 days to a week at a time to get lessons at the barrel patch but many walked away with lessons about horse care, pedigrees, and life in general.

In 1998 she was faced with another challenge when she was evaluating a couple of horses for one of her students. Through a chain of events she was knocked off balance by one horse bumping her while she was looking at the other horse and when she was falling the horse kicked her in the back of the head causing a major brain injury. She spent 17 days in a coma and a month and a half in the hospital and rehab before being able to come home. The doctors and hospital staff didn't have an explanation for her recovery other than it was a miracle. A year later she was competing in the rodeo arena in the sport she loved, barrel racing.

Her last challenge was a battle with cancer that began two years ago with a small outpatient surgery and some therapy administered by a pill. In August of this past year she began having some abnormal back pain which ended up her seeing a few different doctors and a hospital stay for what was originally diagnosed as a heart attack but ended up being discovered that the cancer had come back and metastasized to the vertebrae, ribs and hip. When she was nearing the end of life, she was asked if she was able to walk out of the hospital on a beautiful fall day what would be the one thing that she would want to do. Her response was that she was just fine where she was. She had found peace in a place that she wouldn't have wanted to be in if she didn't have to be.

Mary's blessings came in the form of over 70 buckles, five saddles, numerous plaques, articles written about her, Montana Cowboy Hall of Fame Induction, Lifetime Quarter Horse membership, family, her sons, her grandchildren and great grandson.

Of the many life lessons learned from Mom, perseverance, determination and finding peace in the middle of life's most challenging times were the most important.

Mary still doing at 80 years

We continue to use Ridge Admiral in our Al sire lineup because of how his progeny perform in our environment. The bulls have been well received by our commercial as well as regis-

tered customers and the oldest females are now 8 years old and bringing in good calves while functioning very well in our environment. You will see some of his daughters bringing bulls to this offering and you will continue to see sons offered in future sales. When you study the numbers he is a bull that does well on all the indicies and yet has growth EPDs that are not what some people would say are ideal yet it is where we like it to be for the female to fit our eastern Montana environment. Owned with Sandbur Ridge Red Angus.

We have calved our 7th crop of daughters out of 4304 and are very pleased with their fleshing ability, moderate size, feet and leg structure and calving ease. The 4304 daughters are the largest sire group in our cow herd because of the ability of this sire to produce higher

performance with good caracass and leave the right size and kind of females in the herd. The visitors that we have go through our cowherd usually pick out the 4304 daughters due to their appearance. They also are females that bring in above average calves in the fall of the year.

The Real Deal progeny have more depth of rib and capacity than most other sires that we have used. We are calving the 3rd set of daughters out of this sire and are really pleased with the fleshing ability, depth of rib and udder structure. In a drought year and a 35 day

breeding period with one cleanup bull per 93 heifers, we didn't have a single open out of Real Deals sire group and none of the 2nd calving Real Deal daughters were open. Data like this helps me to know that these genetics are working in our environment. Al sire owned by 5L Red Angus.

We found Copenhagen progeny at the U2 ranch in Canada 7 years ago while touring through their pastures viewing cattle. His daughters impressed us as to their type and kind

that we like, to a point that every cow we asked Joanne Unger what she was out of it would end up being a Copenhagen daughter. We viewed Copenhagen as an 8-year-old bull and found him to be very sound and holding his condition. When U2 dispersed everyone else found the Copenhagen daughters as well and they were one of the highest selling sire groups in a record setting sale. We are now offering the 3rd set of sons and are calving the second set of daughters and have been very pleased with both. Al Sire.

Fusion 5202 is a bull that the Lelands selected out of our 2016 sale. He has been a good calving ease bull for them and has provided both bulls and heifers that have been well received by

their customers. We have been pleased with the calving ease that he has provided after calving three sets of heifers bred to him but the nugget in these genetics are going to be the females that he produces. He has numbers that are very attractive to the industry, minus his growth EPDS, yet his growth numbers will allow his daughters to be able to thrive on less inputs which equates to a better profit margin for the cow/calf producer. Owned with Leland Red Angus.

Foreman is a A.I. sire from 5L that we used the past 3 years because he has the pedigree and EPD profile that will fit well in our program. We used him on both heifers and cows to get a good test across our female base. His sons and daughters did well at weaning, yearling and ultrasound. We are currently calving the third set of heifers bred to him and the first set of daughters and like the results.

After 3 trips to Canada studying the cow herd at U2 we came to the conclusion that we needed to sample a pedigree that worked multiple times in their program. We selected Money Talks out of their 2019 bull sale after studying the bull calves the previous fall as well

as at the sale and studying the cows in the spring and fall. We used 530F on both heifers and cows A.I. and then turned him with 50 plus head of 1st calf heifers for natural service and had only 3 opens. He has now recorded 191 progeny in three calving seasons and are very pleased in the balance of birth, performance, carcass and phenotype. His first and 2nd calf heifers that are currently calving are displaying excellent udders and feet while being good mothers.

We have been using Mushrush Impact AI for four years and appreciate the calving ease, performance and eye appeal produced by this sire. His oldest daughters are 5 this year and nice uddered, good footed, with a moderate frame and raise calves that do well. Owned by Mushrush Red Angus.

Ridge Oak Canyon is a new sire group in the offering this year. We purchased him to use as a cleanup sire and his progeny has out performed what his EPDs predict him to be. His parents are old genetics that don't have much for EPDs yet his progeny are proving that wrong. I am very pleased with his sons in the offering and daughters that we have coming into the herd. Owned with Sandbur Ridge Red Angus.

Fast Break 324E is a sire that we used on heifers his first three years of breeding. Last year we used him on a group of cows with the resulting sons that are listed in this sale. We are pleased with his calving ease, moderate size with depth and thickness that are easy to like. His daughters are the type of females we need more of. Owned with 5L Red Angus.

RIDGE TRUE NORTH 0089

Ridge True North is another new sire group we are offering in this year's sale. We purchased him to use cleanup on a group of cows to introduce a different pedigree into our lineup. His first calf crop has performed well and we are looking forward to getting his daughters into production next year. Owned with Sandbur Ridge Red Angus.

Steward 2230 brings a balance of growth and marbling to his female-making pedigree. By adding Advocate 4304 to the Lot 4's pictured dam, it should create the genetic package for making a great set of cows. Maybe the icing on the cake is the smooth made phenotype that this bull brings in addition to other traits he possesses.

With positive ratios across the board including the top gain and yearling ratios of the offering, 2234 will have some take a second look at his data. If the data is enough to perk interest to take a look, most people won't be diappointed in the length and depth of body along with thickness throughout that lot 5 possesses. His 5-year-old dam will calve Al any day now and her granddam is the donor dam to some of the bulls in the offering. Check out his video on www.DVAuction.com!

Lot 6 posseses the highest weaning ratio, 2nd highest yearing ratio, and 3rd highest marbling score in this sale while maintaining many indicies and EPDs in the front end of the breed. His pictured dam combines Admiral, Fusion and data in the front end of her pedigree, giving her the tools to produce a MPPA of 107 which matches her dam's MPPA, while her granddam posted a 112 MPPA. Her dam also raised the heifer calf that was selected out all our heifers to go to the NILE this past fall.

Dam to Lot 8 • MLK CRK EMUMAR 024

CED BW WW YW ADG DMI M ME HPG CEM ST MARB 12 -0.8 39 71 0.20 1.53 28 7 14 6

70% 97% 90% 67% 57% 28% 73% 12% 75% 14% 80% 33% Lot 8 is a larger framed Oak Canyon son that has competed extremely well against his competition considering his age and the age of his dam. His 13-year-old donor dam continues to produce functional performance with a 107 MPPA. Lot 8 continued to gain on his older contemporaries until at yearling weight he only had 4 bulls weigh more than he did with actual weights that day.

The combination of Impact with Admiral has produced a bull that competes well against his contemporaries at every step from birth through growth as well as carcass. He also competes well within the breed, ranking in the top 1% for ProS and Herdbuilder respectively. While his stats might be attractive, his best attribute might be his phenotypical profile. It is not typical to find a low birthweight bull with the dimension that he possesses.

Studying pedigrees helps us to identify that lot 16 is more than a 3/4 brother to lot 15 which would provide an opportunity to purchase a closely related bull to put with a group of heifers. This Impact son has as much dimension as you can find in a low birth weight, calving ease bull. He also brings positve ratios on all the growth and carcass measurements while maintaining the top 2% breed rank for both the ProS and Herdbuilder indicies.

Block, Chunk, or Tank are three words that might best describe lot 19. He is moderate with depth and thickness to balance his profile. Admiral 2232 started with a moderate birth weight and then added above average growth and gain ratios to go along with his substantial ribeye scan. His dam is a dark red, good footed and uddered Firecracker daughter that most people would want to replicate.

Headman 2336 offers that moderate birth weight with above average growth, gain, and carcass ratios. His maternal granddam is the mother of Lot 19 which is a cow that we would like to have a whole herd of.

Ranch Philosophy

The cattle industry is constantly changing and feeders and packers seem to be the drivers in directing that change. Their ability to direct change is related to the concentration of ownership within these two segments of our industry. Both segments keep increasing the size of animal that they want to feed and harvest because of their efficiency of producing more pounds of beef per animal and reducing the costs by feeding and harvesting less head of cattle and leaving them within the feedlot for longer periods of time. What impacts their bottom line is diametrically opposed to what impacts the cow/calf producers bottom line.

In our segment of the industry, most cow/calf producers raise cattle in an environment that has limitations to what it can produce hindering our ability to meet the changes without increasing input feed costs to sustain the larger, higher output cattle that the feeders and packers are looking for. Coupled with this the feed input costs has increased dramatically over the past four years compounding the problems to reach profitability within our segment of the industry.

I am thankful that our Red Angus Association staff is working hard to educate the industry on the quality of Red Angus cattle and how they can reach all the requirements in the branded packer programs that have been set for Angus cattle. Through this effort, the USDA has recognized Red Angus as Angus so that they are able to qualify in all programs with the exception of CAB which is owned by the Angus Association. This education is going to take time to develop traction and will eventually open more marketing opportunities for our cattle. In the meantime, the industry is using excuses to discount red hided cattle so that they can add more profit to their segment of the industry. With the current cattle inventory, we are hopeful that the next three years will see above average feeder cattle demand which will diminish the ability for discounts because of hide color.

We continue striving to produce cattle that will be able to thrive in a grass-based environment without any inputs other than salt, mineral and some hay when needed due to drought or severe winter conditions. When you study the genetics that we are using you might ask, why don't you use higher growth sires to increase the weights of your calves? The answer lies in what we have discovered when we have attempted to do that very thing. Most sires that we have used to accomplish this, with exceptions of a few outliers, tend to produce females that have a higher percentage chance of failing to breed as yearlings or first-calf heifers because they have a higher energy requirement than what our natural environment can provide. That can become very expensive when you account for the time and dollars invested in developing those females to that stage.

The sires that we are using will still push the envelop of producing offspring with performance that is limited by our environment on any given year because our weaning weights can fluctuate 50-100 pounds based on when and how much rain falls from the sky. We continue to search the breed for the outliers that will push the performance as well as carcass traits but will not give up the fertility and longevity developed within the herd which are the key profit drivers for any cow-calf operation.
