# PRICKLY PEAR

*Simmental Ranch*

**SELLING 140 BULLS**

**MONDAY, FEBRUARY 9<sup>TH</sup> AT 1:00 PM MST • HELENA, MONTANA**

**PRICKLY PEAR**  
*Simmental Ranch*

**DEAR CATTLEMEN:**

What a year for cattle producers. With prices on calves and cull animals breaking records all over the United States. It makes being in this industry look like we're on the right path finally to insure that our future generation of farmers and ranchers can make an excellent living again.

As I sit here and write my Dear Cattlemen letter for the 20th year, there has been some big changes around Prickly Pear Ranch. I accepted an opportunity to look at leasing a ranch of my own to add to the future expansion of the Prickly Pear program. Tyler has taken on the day to day at Prickly Pear Ranch. I will be overseeing the genetic decisions on the herd and help with the AI breeding all of the cattle. In the future, we are looking at using the herd I'm working with to test all of the genetics that we produce to insure even more that we are producing the best genetics for our customers. Our hope is to start producing up to 150 commercial bred heifers that are Prickly Pear genetics. Feel confident that you will continue to receive the same genetics and guarantees that we have always provided.

Now on to the bull offering. This year we ramped up our 2 year old program to 50 plus also adding another consignor, Jace Burrier, to go along with Keller Angus that sold with us last year.

Again this year we have a nice set of embryo bulls out of the Great 6053s donor. There are three Marda Blacksmith, a High Road purebred bull and the last Commodore embryo out of her.

We have a 17 Predictable sons in the sale. Again, they went right to the top of the bunch. He produces cattle with high fertility lots of length and above average thickness.

Schooley Standout has 7 sons in the sale. He sires depth of body with excellent disposition. The daughters did an excellent job for us this year producing above average calves.

I added the Harvest Moon AI sire this year and I'm very impressed with what he produced adding thickness, length on a moderate frame.

There are 4 Major Impact sons this year he will add a lot of thickness while not increasing the birth weight too high.

This year there are 7 Bold Ruler sons that are high calving ease low birth weight bulls. He adds length great disposition and the ability to use them on heifers or cows.

I also went back to the TJ Roosevelt bull last year to produce some more females for our herd. The 3 bulls in the sale will produce some top females for any herd.

The last bull I would like to touch on is Progressive. He sires low birthweights with above average growth and excellent dispositions. I'm looking forward to the upcoming calving season so we can see a large group of Money Maker calves and also the calves out of the Money Maker son King Chester that sold to Jake Fritz in last year's sale.

We will also be getting calves out of the new herd sire Airborne purchased for Lassle Ranch last year.

**Looking forward to seeing everyone on the 9th!**  
**Sincerely, Prickly Pear Simmental Ranch**  
**THANK YOU ALL FOR THE INTEREST!**

## SALE INFORMATION

### **HOTEL:**

Hampton Inn, 725 Carter Dr. Helena, MT 59601 • 406-443-5800

### **SALE DAY LOCATION :**

#### **PRICKLY PEAR SIMMENTAL RANCH SALE BARN**

**2853 Canyon Ferry Road, Helena, MT**

**DIRECTIONS: FROM I-15** - Take Custer Avenue Exit (#194). Head east for 3.1 miles. At the one mile mark it will reduce to a single lane and turn into Canyon Ferry Road. The sale facility will be just after a gravel pit pond on your right.

**FROM THE EAST ON US 12** - At the west end of East Helena turn right (N) before the Exxon Gas Station (first turn after the two stoplights) go north approximately two miles to a stoplight. Turn left (W) onto Canyon Ferry Road. Go about 3/8 of a mile, our sale facility is on the left.

**FROM THE WEST ON US 12** - Turn left (N) at 3rd light (Henderson Street). Turn right (E) at stop sign in front of fairgrounds (Custer). Continue east until you cross over I-15 and then use the directions from I-15 above.

**SIGHT UNSEEN PURCHASE:** We guarantee all sight unseen purchases. Call ahead of time and we will go over the offering. You can leave a bid with us or a representative, or you may bid via the phone or on the Internet during the sale. You will be treated as though you are here at the sale. Please call us if you need additional information.

**GUARANTEE:** All bulls are guaranteed breeders. As our valued customers if you have any problems at all, let us help you solve them. Our livelihood depends on your satisfaction.

**TRUCKING:** We give \$125 per bull discount if you haul your own bulls on sale day. We deliver free around April 1st if within 300 miles, otherwise guarantee no more than \$400 per bull in Continental USA.

**VOLUME DISCOUNT:** 3% OFF WITH PURCHASE OF 5 OR MORE BULLS.

**TERMS & CONDITIONS:** All cattle sell under the terms & conditions of the American Simmental Association: Terms available sale day and ASA web site.

**EPDs:** EPDs listed are BOLT 12-30-26. Please note EPDs may change from the time sale catalog is printed until registration papers are transferred.

**UPDATES & SALE ORDER:** Additional information & sale order can be found on the Eberspacher Enterprises Inc. Facebook page. Like us and receive all sale updates automatically or download the EE phone app.

**ANNOUNCEMENTS:** Announcements made sale day and from auction block during the sale take precedence over printed material associated with this sale. Anyone attending this sale attends at their own risk. Breeders or any of the sales force will not be held responsible for any personal injury for attending this sale.

**LIVESTOCK INSURANCE:** Available sale day through sale management.

*Ultrasound & Scan Data available sale day.*

NEW CUSTOMERS

- For those of you that are new customers. I just want to go over a few goals we strive for:
1. Disposition. I see a lot of people now are putting disposition codes in their catalogs. We take great pride in the disposition of our cattle, so you can assume they're all very docile unless noted by us.
  2. Retaining growth while improving everything else we all want. Calving ease, smaller birth weights, moderate frame size, good udders, feet, etc. Growth is one of Simmental's best assets. Some people are concentrating on birth weights so hard they are losing the growth advantage.
  3. We concentrate more on calving ease and maternal calving ease than birth weights. All the bulls in the sale were unassisted at birth.
  4. We also look at individual performance more than growth EPDs. The EPDs will change if the animal has the performance, but the animal won't always perform just because he's got good EPDs.

RETAINED SEMEN INTEREST

The bull buyer will receive full possession, 100% salvage value, and 2/3 semen interest of any bull purchased in this sale (unless otherwise noted). This means we are retaining a 1/3 semen interest in these bulls. This semen interest is a royalty interest that entitles Prickly Pear Simmental Ranch (PPSR) to 1/3 of the revenues of any semen sold. PPSR semen interest remains even if the bull or any interest in the bull is sold to a third party. It is the buyer's responsibility to ensure that PPSR's interest is upheld if semen is ever sold. The buyer must also inform any third party of PPSR's interest if the bull is ever sold. PPSR will not be responsible for expense related to semen collection or promotion of any bull purchased, unless a mutual agreement is reached prior to semen collection or promotion. Our retained semen interest also includes the right to collect semen on the bull at our expense and the buyer's convenience.

ACTUAL SCROTAL MEASUREMENTS

We do not believe in adjusted yearling scrotal measurements, therefore all scrotal measurements are actual figures. Actual measurements will be taken at the end of January. All bulls under 30 centimeters will be sifted regardless of age. The bull's testicular size is an early indicator of puberty, which is passed on to their sons and daughters. Bulls with larger testicles service more cows and produce more semen, plus their daughters cycle at an earlier age and have a higher conception rate.

All bulls are measured and palpated by Derek Brown DVM prior to sale. Since a lot can happen between January and April, they will all be fertility tested prior to delivery. The extra \$25 added to our \$100 off if you take your bulls on sale day is to pay for testing at home with your other bulls. The scrotal measurements will be on a supplement sheet along with carcass data.

Most testicular growth occurs from nine to twelve months of age. Remember to consider the age of the calf at the end of January when using these measurements.

BEEF IMPROVEMENT FEDERATION  
RECOMMENDATION FOR  
SCROTAL CIRCUMFERENCE

| MONTHS OF AGE | 1-12  | 15-20 | 21-30 | 30+   |
|---------------|-------|-------|-------|-------|
| EXCELLENT     | 35    | 37    | 39    | 40    |
| GOOD          | 30-35 | 31-37 | 32-39 | 33-40 |
| POOR          | 30    | 31    | 32    | 33    |

EPD & Index Definitions

*Instructions: The following are definitions of ASA's EPD and indexes and can be used by members in their catalogs or other marketing material to define EPD and indexes.*

**CE** • Reported as the difference in percentage of calves being born unassisted out of first-calf heifers, with higher values representing greater calving ease.

**BW** • Reported as the difference in pounds of calf birth weight.

**WW** • Reported as the difference in pounds of progeny weaning weight.

**YW** • Reported as the difference in pounds of progeny yearling weight.

**ADG** • Reported as the difference in post-weaning pounds gained on a daily basis.

**DMI** • Reported as the difference in pounds of daily dry matter intake.

**MCE** • Reported as the difference in percentage of daughters calving unassisted as first-calf heifers.

**MILK** • Reported as the difference in maternal pounds of weaning weight from an individual's daughters due to milk.

**MWW** • Reported as the pounds of weaning weight expressed in daughters' progeny due to the milk production of the daughter and the direct genetic effect for weaning growth.

**STAY** • Reported as the difference in probability of a sire's daughters staying in the herd until 6 years of age, given that they calved as a 2-year-old.

**DOC** • Reported as the difference in yearling-age progeny temperament, represented as a difference in probability that progeny will be scored as a 1, rather than a 2-6 on the docility scale (1 = docile disposition; 6 = extremely aggressive).

**CW** • Reported as the difference in pounds of progeny carcass weight.

**YG** • Reported as the difference in progeny USDA Yield Grade score units (1-5).

**MARB** • Reported as the difference in progeny carcass marbling score.

**BF** • Reported as the difference in inches of external backfat at the 12th and 13th rib.

**REA** • Reported as the difference in square inches of ribeye area between the 12th and 13th rib.

**\$API** • Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold on a grid (carcass grade and yield).

**\$TI** • Evaluates sires for use on mature Angus cows with all offspring put on feed and sold on a grid (grade and yield).

**\$GAIN** • A prediction designed to identify animals that are more profitable in the feedlot by converting feed into weight. \$Gain is a combination of DMI and ADG, where ADG is weighted by the value of a pound of gain, and DMI is negatively weighted by the cost of a pound of dry matter. \$Gain is expressed as the dollar difference per head per day during the post-weaning period.

One of our favorites... 5031 was a slow bloomer but has really stepped up to the plate. He is line bred back to Basin Lucy 4261. She is the dam to a long line of high selling daughters and a son selling for \$132,000. 5031's foot scores are superb @ 1% and 3%. His WW and YW rank in the top 10%. His sire is a true beef sire! He has a rare combination of traits breeders are desperately searching for. He exhibits excellent foot quality with extra heel depth while still ranking in the top 2% of the breed for Marbling. He is a nicely structured, wide based, deep bodied sire with extra width of top and muscle expression.

# NO LIGHTWEIGHTS

Simmental calves are champions of the scale.

They reliably outperform straightbred calves in the feedyard — with better growth, better structure and fewer health problems.

They add pounds without sacrificing marbling, and they come with the **IGS Feeder Profit Calculator**, which factors genetics, health and management into true value.

Want low-risk, high-potential calves with earning capability?

# MORE PER HEAD PERIOD

**EFFECT OF SIRE BREED ON  
SALE PRICE OF BEEF STEER CALVES**  
Superior Livestock Auction, Summer 2020\*

SimAngus™-sired steer calves sold through Superior Livestock Auction in summer 2020 earned **more at sale time** than all other calves.\*

It's no wonder the percentage of SimAngus™ calves marketed through the industry's largest video auction has grown **eightfold** since 2010.

Want low-risk, high-potential calves with earning potential?

\*For lots of 50 head or more. †Kansas State University, December 2016, Superior Livestock Auction data analysis of 3,110 lots, 256,900 head of beef calves marketed during summer 2020. (N=3000)

\*\*Lots that qualified for breed-related programs were excluded from the model due to potential confounding effects with sire breed analysis and, for many, few lots in the data.

\*\*\*Means without a common superscript differ (P<0.05). Lots of calves in breed-identified groups were used by bulls from the respective breeds and out of dams with no Brahman influence.
