# Welcome

As I write this letter, winter in Montana has arrived with 2 degrees above 0 and a nice wind to allow us to feel the temperature. What a difference a year can make. We have enjoyed an open winter thus far with unseasonable temperatures for most of December and January. On top of that we were able to break out the haying equipment this past summer to put up some hay which has been scarce over the past three years. One of the main differences of the year has been an open winter coupled with enough grass standing to graze through most of January without having to feed anything except mineral and salt.

This past May we were able to visit Wickstrum feedyard where our commercial steers are fed while attending Jaclyn's (our youngest daughter) graduation from Kansas State. The Wickstrum family has purchased our steer calves five out of the last six years. We have been able to watch the progress of the steers through weight and harvest data but have not been able to go and walk through the steers just prior to harvest. It was rewarding to see how the steers grew out and developed, but more importantly that they are working for the feeder. We have always concentrated on making the right type of cow that will be profitable for our operation in eastern Montana but their progeny need to be profitable for the next owner in the beef chain. Trying to hit this mark is challenging because we are working with antagonistic traits. We want a moderate, easy-fleshing, fertile cow that minimizes input costs in our operation while producing a steer calf that grows and gains as much as possible. Yet if it is a heifer calf we don't want her to be any bigger than her dam. We are seeing cow size increase in many operations that are pushing the growth envelope. That size increase results in more inputs that will have a cost related to it. That cost may be added energy requirements that, when are not met, result in lower conception rates in the younger animals. With fertility being the largest profit driver in the cow-calf segment of the beef industry we are trying to produce a cow that will breed back each year without increasing the input costs.

This year we are offering five new sire groups to our lineup that offer the traits that keep the female as the focal point yet offer decent growth and carcass traits to produce profitable steer counterparts. We continue to search for new genetics that will offer these traits without sacrificing a consistent phenotype that is appreciated by the discerning eye. Most of these new sires were used on both heifers and cows to get a feel for calving ease as well as performance throughout different age groups of females. We are pleased with how each of these sires has done but more importantly that all of their progeny fit together with each other and our other sires that have offspring in this offering. We are ultrasounding for carcass traits on Feb. 25. This data will be available online approximately March 1st. Supplemental sheets with additional data will be available online and on sale day.

We welcome Open 8 Genetics as a guest consignor to this year's sale. They purchased some donor cows from us to add Red SimAngus genetics to their program.

We continue to participate with the Top Dollar Angus certification program in order to identify the sires in this offering that will qualify feeder calves to be marketed through the Top Dollar Angus marketing program. The bulls in the sale that qualify will have a Top Dollar Angus logo underneath their information. This is a program that will benefit producers that retain ownership or sell calves in any of the marketing methods available.

We are thankful for the opportunity to steward the resources that we have been blessed with and to meet so many great people that are involved in the Red Angus breed. We look forward to visiting with or seeing many of you in the near future.

God Bless You!

Milk Creek Reds – Bruce, Tena and Jaclyn Ketchum, Jeff & Cele Menees

# Sale Information

## Milk Creek Reds Bull Sale Saturday, March 16, 2019

1 p.m. MDT • Milk Creek Reds Ranch • Plevna, MT

Selling:

**91 Yearling Red Angus Bulls**

### SALE DAY LUNCH:

Complimentary lunch and pie will be served at 11:30 a.m.

### SALE LOCATION:

At the Ranch (see map on page 2 for directions)  
2093 Plevna Road South, Plevna, Mont. .... 406-778-3819

### CATTLE VIEWING:

The bulls can be viewed at Bruce & Eric Bowman's feedlot 1 mile south of Rhame, N.D., until March 15th. After this time the bulls will be at the ranch.

### SALE VIDEO

The video of the sale cattle will be available to view by March 1, 2019, at [www.milkcreekreds.com](http://www.milkcreekreds.com) or [www.dvauction.com](http://www.dvauction.com). If you don't have high speed internet or are unable to view the video over the internet, contact us for a DVD on the sale cattle.

### SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

Online bidding will take place on DVAuction. Go to [www.dvauction.com](http://www.dvauction.com).

### PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders. If there are several people needing to use this method for the sale we will set up a conference call for you to call into during the sale. Please call a few days in advance if this is needed so that we may set this up and get you the necessary phone number and information ahead of sale time.

### SALE CONTACTS:

**Milk Creek Reds**  
Bruce and Tena Ketchum ..... 406-778-3819 (Home)  
406-978-3819 (Cell)

**Auctioneer:**

### AIR TRANSPORTATION

Billings, Mont. .... 230 miles  
Rapid City, S.D. .... 190 Miles  
Bismark, N.D. .... 230 miles

### CATALOG & PROMOTION:

Tracey Koester, Cow Camp Promotions ..... [www.cowcamppromotions.com](http://www.cowcamppromotions.com)

### LIABILITY

All persons who attend the sale or view the cattle do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents that occur on the sale or viewing premises.

### ACCOMODATIONS:

#### Baker, Mont.

(If planning to stay please reserve early as the oil field activity can cause room shortages.)

Montana Motel ..... 406-778-3315 or 800-779-8353  
Red River Inn ..... 406-778-3321  
Sagebrush Inn ..... 406-778-3341

#### Miles City, Mont.

Comfort Inn ..... 406-234-3141  
Miles City Inn & Suites ..... 866-599-6674

### TERMS

The terms of the sale are cash. All settlements will be made with clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on sale day take precedence over any statements printed in this catalog or advertisement.

### DELIVERY

We will provide delivery up to 300 miles. Over 300 miles we will work with the buyer to make arrangements on delivery. **A \$100 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale.** Delivery of the bulls will start the week after the sale.

### BULL HEALTH PROGRAM

The bulls received Vision 7 at branding and then were preconditioned in August with Bovishield Gold One Shot and Vision 7 Somnus. The bulls were boosted with Bovishield Gold in September. They received a Fusiguard injection in November and a booster four weeks later. The lice prevention program consisted of Ivermax in November, Stanguard in December, Cydecton in late December, and Saber in January. Semen evaluations were performed by Dr. Liam Robbins of the Fallon County Vet Service prior to the sale and all the evaluation forms will be available sale day.

### BULL DEVELOPMENT

The bulls are fed on a ration to develop them into sound functional useable bulls for big country. They are fed to gain 2.5 lbs per day. The ration consists of whole kernel corn (7.5 lbs), dry distiller's grain (2.5 lbs), corn silage (13 lbs) and the balance a mix of wheat hay and alfalfa/grass hay. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lb gain. They have been developed at Bruce & Eric Bowman's feedlot which is located 1 mile south of Rhame, N.D.

### SEMEN INTEREST

Milk Creek Reds is retaining one-half revenue-sharing semen interest in all bulls in the sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale.

# Sale Information

## WATCH AND BID ONLINE AT DVAUCTION.COM

### Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at [www.dvauction.com](http://www.dvauction.com)
- Click on the "Register" tab
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
- Complete the process by filling out the Banking & Lending information requested.

Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.

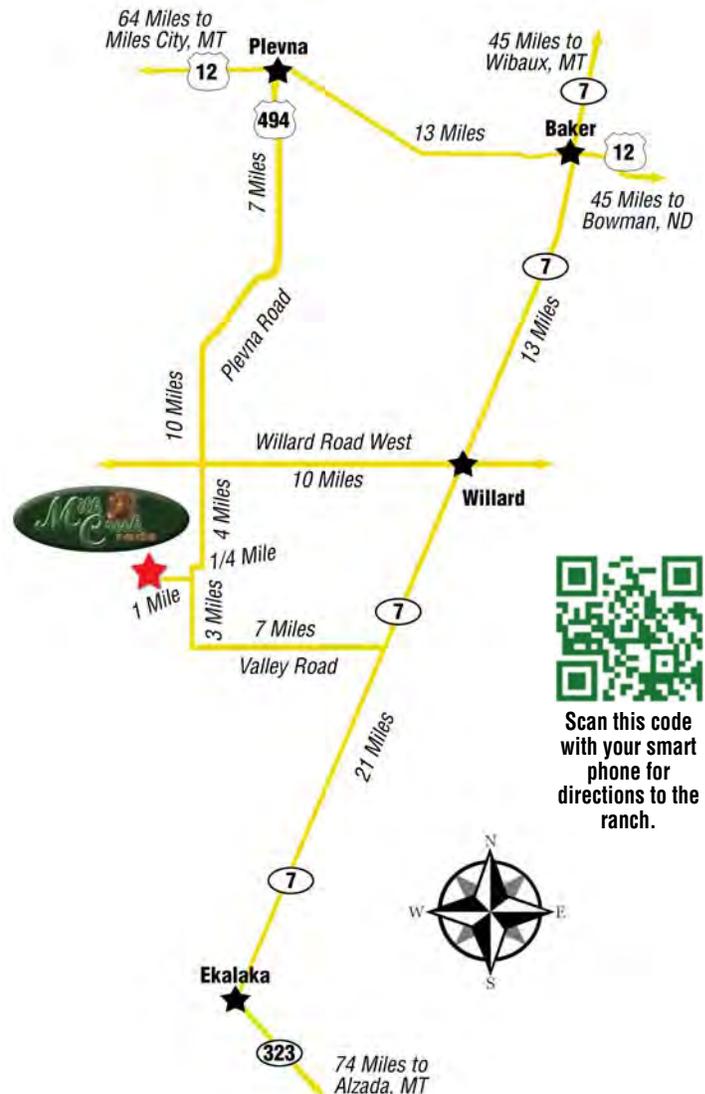

If you would prefer to be approved using your credit card, call (402) 474-5557.

Please be sure to apply for bidding at least a day in advance of the sale—every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email [support@dvauction.com](mailto:support@dvauction.com).

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Scan this code with your smart phone for directions to the ranch.

We are starting to calve our second crop of daughters out of 4304 and are very pleased with their fleshing ability, moderate size, feet and leg structure, and calving ease. The 4304 daughters are the largest sire group in both our first- and second-calving heifers because of the ability of this sire to produce higher performance with good carcass and leave the right size and kind of females in the herd. Fertility does not seem to be an issue with this sire's daughters as all of the first calvers bred back, the majority doing so at the beginning of the breeding season. Also, out of 30 yearlings and a short breeding season, there were only two open.

This is the first progeny that we have offered out our new herd sire from Sandbur Ridge Red Angus. We used 6013 A.I. on both heifers and cows and then used him naturally on 48 2-year-old heifers where he held his flesh well. These first progeny calved well, weaned above average (101 ratio), performed at a year of age above average (101 ratio) and have the type and kind that seem to work.

We have used 3411 both A.I. and naturally over the last three years which has provided us with 195 progeny to determine his genetic merit to our program. He is a bull that is always fat whether it be the middle of breeding season or winter. His daughters are moderate young cows and heifers that have nice udders and are easy fleshing like their sire. He also transfers some top carcass traits to his offspring that will enhance the value to the feeder calves when they are hung on the rail. Every one of his sons qualify for the Top Dollar Angus program.

We continue to be pleased with our progeny out of Z352. We A.I.ed both heifers and cows to Z352 with great results from low birth weights and calving ease to above average weaning and yearling ratios. These progeny do not have your typical low birth weight, calving-ease look. Instead they have rib shape and muscle which can catch your eye.

Firecracker is a full brother to the popular 5L Independence bull. Tena and I saw Firecracker at World West Sires and thought that he was moderate and offered good thickness for a calving-ease bull. We used him A.I. on heifers and like the results. He offers calving ease with adequate growth and puts it in a package that offers shape and muscle that we like.

The 2069 young females in our herd are the reason that we continue to use this sire. They are moderate, dark red, good footed with beautiful udders. We have used him cleanup on heifers for the first three breeding seasons and are using him on cows through A.I. as we sold him as a 5-year-old bull back to Sandbur Ridge Red Angus.

6120 is a new herd sire that we purchased from Heart River Ranch. He is a well-balanced young bull that is easy fleshing, above average thickness, and is very attractive. We have used him as a clean-up sire on cows. His progeny are below average at birth and ratioed 100 at both weaning and yearling against proven sires with more growth than him.

We purchased Redman in the Crowfoot dispersion in Canada because we really liked his dam and needed a calving ease bull. We are calving the third set of heifers that we have bred to him and enjoy the calving ease that he brings to the table. His second set of daughters are calving this year and they are the right type.

We purchased Lacy King from Dale and Kay Lacy in Missouri. We really liked his dam and his half-sisters as young cows in the Lacy herd as well as his sire's daughters that were in production. We now have 2-, 3-, 4- and 5-year-old females in production. They have good udders and a good disposition, and he offers very good calving ease as well.

## Top Dollar Angus Feeder Program

Top Dollar Angus is a genetic-certification and marketing company focused exclusively on the top 25% of the industry in carcass and growth Angus and Red Angus-influenced feeder cattle. Top Dollar Angus is a program similar to other popular branded-beef programs, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market.

Qualified herds must have two or more generations of Angus (Black or Red) genetics with growth and carcass traits objectively ranking in the top 25% of the breed based on documented historical sire use. DNA evaluation, conducted by Zoetis or GeneSeek, is another workable method to qualify. Once your cattle have met the necessary requirements, they will be marketed under the Top Dollar Angus brand and logo, and will be promoted aggressively to a large number of feed yards and buyers. In today's market, Top Dollar Angus cattle are seeing premiums ranging from \$30 to \$70 per head above the average market.

Why the premium? Cattle feeders know that Top Dollar Angus cattle perform better and have higher grid-based carcass rewards compared to other cattle. This puts more dollars per head into the cattle feeder's pocket, which can be passed back to the producer in the form of premiums paid above market price.

Top Dollar Angus helps take the guess work and surprises out of growing and feeding cattle. Feed yards are tired of unpredictable performance and wide-ranging profitability results from group to group on cattle they purchase. Cattle often look the same and have the same colored hides, but are very different genetically. That's why the genetic certification of high-end Angus and Red Angus feeder cattle is here! The industry must differentiate the best Angus and Red Angus genetics from average cattle, and that's what Top Dollar Angus will do for you!

If you have consistently invested in high-performance Angus or Red Angus genetics, Top Dollar Angus will make your cattle stand out from the pack and get you the premiums you deserve. No matter how you market your cattle, our goal is to create more demand and higher prices for your calves.

# THRIVE

Position your ranch to thrive with Red Angus-sired calves.

Red Angus bulls unlock premiums by siring calves with a market advantage that buyers appreciate both in the feedlot and the replacement heifer pen. Plus, the Feeder Calf Certification Program yellow tag adds another layer of price advantage through genetic, age and source verification. Thrive on sale day with Red Angus.

Ranch Tested. Rancher Trusted.

## A Tribute to Reg Hoff January 1, 1949 – August 10, 2018

**There will be a seat at this year's bull sale that will be empty ...**

Normally that seat would be filled with a fun-loving man that wore a Silver Belly cowboy hat. He had a personality that could fill the big Montana Sky, a smile that could power the Colstrip Power Plants, a gift of stewardship whether it be reclamation of land, agricultural education to the community or coaching a basketball team. His love for Lana, their daughters and families, and RED ANGUS cattle was evident. He experienced how the Red Angus cattle could work from the desolate prairie at Forsyth to feedlots in Nebraska and on the rail in a meat plant.

The Ketchum family was truly blessed to have him in our lives as he was a great friend.

Most cattlemen will be able to pick 8208 out of a pen of bulls. He is loaded with capacity and muscle that starts over the rib and carries deep into the rear quarter. His Epic 8171 sired dam has kept up with her contemporaries by posting an average 103 weaning ratio and 106 yearling ratio on 5 calves.

The dam to 8209 is a moderate framed Secret Agent daughter that has a 104 MPPA and posts weaning and yearling ratios of 106 and 107 respectively. His sire, Admiral, should wrap the package of great maternal with good carcass traits so that 8209's progeny will leave great replacement females as well as profitable feeder calves.

Firecracker has produced calves that come easy and then grow very well. 8223 is an example of this yet has length, depth and thickness to go along with it.

Steers at Wickstrom Feedlot in May 2018

*This Mushrush Impact Z352 son may be just what you need to "build your herd." This moderate BW bull ratios well, while staying strong in different maternal traits like HPG, STAY and CEM. He also ranks in the top 7% and 8% for WW and YW respectively. While his numbers may be appealing, phenotypically he's also not the worst thing to look at. This clean-fronted prospect is level throughout his top while maintaining capacity and shape through his hip. Cattlemen and women, this bull is single and ready to mingle.*

8274 posted the top weaning ratio in the first-calf heifers. He started out at a modest 75 pounds and went on to adjust over 750 at weaning. He has numerous generations of calving ease in his pedigree which should make him a great heifer bull.

Most of our Admiral progeny are like 8288 which carries the dark red color with added capacity and thickness. His added performance combined with a low birth weight is an added bonus for his new owner.

Some cattlemen think that there should be a strong cow family behind the bull that they are selecting. 8299 fits that mold with his Redstone dam posting a 105 mppa followed up with average ratios of 108 and 104 for weaning and yearling. Her mother and her maternal sisters have progeny in the offerings as well.

# Yearling Bulls

**Open 8 Genetics  
Powderville, MT  
Danny and Danny Krantz  
Dean and Karen Wang**

We are excited to have the opportunity to work with the Ketchum family. When we made the decision to purchase a few Red Angus donors to add Red SimAngus genetics to our program, the choice was easy. We had the opportunity to purchase three donors in 2014 and three more in 2017, as well as; MLK CRK Sheba 048 in the spring of 2016 and MLK CRK Thunder 511 at the NILE sale in the fall of 2016. 048 was the top-selling bred heifer at the NILE sale in 2011 and 511 was in 2016. These cows have made an outstanding set of donors for us to build our red foundation with. Milk Creek cows fit our maternally based herd perfectly.

We are very pleased with our Provision progeny. When you study 8312 among his contemporaries you will find that he has performed well above average and when you look at him you will find him to be moderate framed, deep and thick. His dam is a tanky Secret Agent daughter that posts an average weaning and yearling ratio of 110. She represents the type of cow we strive to produce phenotypically and productively.

8339, 8341 – Every now and then you will come across a flush that will produce such uniformity on both the bulls and heifers you will want to repeat it over and over again. These three flush brothers have a lot to offer across the board whether it is their great phenotype, high performance or maternal pedigree, they package it all together well. 8408 is the third flush brother.

8345 descends from one of our strongest cow families. His dam is an ET daughter of Epic out of the Lakina 523 cow that sold to Sandbur Ridge Red Angus in our 2014 Female Sale as our second high seller. He will be easy to find in the pens because he has the length, thickness, depth and eye appeal to attract attention.

We have used 8357's sire and maternal grandsire for three years cleanup on heifers with great results. The calving ease is great but the daughters out of these two sires are even better because of the type of female that they are leaving in our herd.

Every now and then you will come across a flush that will produce such uniformity on both the bulls and heifers you will want to repeat it over and over again. These three flush brothers have a lot to offer across the board whether it is their great phenotype, high performance or maternal pedigree, they package it all together well. 8339, 8341 are flush brothers.

# THRIVE

Ranch Tested. Rancher Trusted.

**Red Angus**  
RedAngus.org

Position your ranch to thrive with  
the industry's most-favored female.

An independent university study compared eight years  
of Superior Livestock Auction data, revealing  
Red Angus-sired heifers commanded up to \$11/cwt  
more than females of all other breed types.

**Some say it was in the water,  
Some say it was the cold weather,  
Some say the Red Angus fertility rubbed off,  
God says, "Blessed is the man whose quiver is full of them." Psalms 127:5**

If you have been to our sale, many of these adult faces will look familiar to you. Greg, Connor, Elin, Brittani, Kiplee, Dean and Amanda have either been sorting bulls, running a gate, on the block, loading out bulls, at the registration table, in the kitchen or doing whatever needed done. We appreciate every one of them and couldn't pull the sale off without them.

**God truly has blessed us with these young couples and their little blessings!**
