Welcome

We take this opportunity to welcome you to our 2020 sale catalog and genetic offering that has been produced physically in one year but genetically developed over the past 35 years. As we embark on this new decade, we look forward to new innovations within our industry that will help us to be more efficient and profitable at what we do but we know that current economic state in the agriculture industry is far from where it needs to be.

In these challenging economic times, we hope that the genetics that we are producing will help to develop more efficient animals that can maintain on less inputs. We were blessed again this year to utilize stockpiled grass throughout most of January and we added water, salt and mineral to complete the diet of our cows. We have discovered over the years that certain genetics will do well in this type of environment and others can become challenged. Our goal is to use our environment to sort the genetics that work and replicate them and remove the genetics that fail and move on.

We continue to search for new pedigrees that we feel have potential to work for how we run our cattle. This year we are introducing four new A.I. sires and three new natural service sires in our offering. Part of our evaluation process on these new sires includes using them against sires that are semi-proven within our herd in large contemporary groups with numerous progeny per sire to determine their genetic merit. Another evaluation component will come this spring and fall when the daughters of these sires have been developed on grass and are asked to breed in a short breeding period with a fixed time A.I. followed up with one cleanup bull to approximately 100 heifers. Again, in this scenario some of the genetics will fail and be removed and the rest will be what we move on with.

The bulls in the offering were developed at Eric and Andrea Bowman's at Rhame, ND, where they have roomy pens and a small pasture to get plenty of exercise. Eric feeds them to gain around 2.5 pounds per day which allows them to express their ability to gain while keeping a focus on their future primary role which is roaming pastures and getting cows and heifers pregnant. This is the 25th year of the Bowmans feeding our yearling bulls.

We continue to participate with the Top Dollar Angus certification program in order to identify the sires in this offering that will qualify feeder calves to be marketed through the Top Dollar Angus marketing program. The bulls in the sale that qualify will have a Top Dollar Angus logo underneath their information. This is a program that will benefit producers that retain ownership or sell calves in any of the marketing methods available.

We hope that you find the information within this catalog useful in making selection decisions. If you have any questions in which we can help by providing additional information, feel free to contact us.

We are thankful for the opportunity to steward the resources that we have been blessed with and we look forward to the opportunity to visit with people who have the common love for this great breed of cattle.

God Bless You!

Milk Creek Reds – Bruce, Tena and Jaclyn Ketchum, Jeff & Cele Menees

As servants of the Lord, we are striving to be stewards of the land and cattle that He created and allowed us to manage so that we may glorify Him.

Sale Information

Milk Creek Reds Bull Sale Saturday, March 21, 2020

1 p.m. MDT • Milk Creek Reds Ranch • Plevna, MT

Selling:

99 Yearling Red Angus Bulls

SALE DAY LUNCH:

Complimentary lunch and pie will be served at 11:30 a.m.

SALE LOCATION:

At the Ranch (see map on page 2 for directions)

2093 Plevna Road South, Plevna, Mont. 406-778-3819

CATTLE VIEWING:

The bulls can be viewed at Bruce & Eric Bowman's feedlot 1 mile south of Rhame, N.D., until March 18th. After this time the bulls will be at the ranch.

SUPPLEMENTAL SHEET

Supplemental sheet with Updated EPD's, Scrotal Measurements, Frame Score will be available online a few days before the sale and on sale day.

SALE VIDEO

The video of the sale cattle will be available to view by March 1, 2020, at www.milkcreekreds.com or www.dvauction.com. If you don't have high speed internet or are unable to view the video over the internet, contact us for a DVD on the sale cattle.

SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

Online bidding will take place on DVAuction. Go to www.dvauction.com.

PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders. If there are several people needing to use this method for the sale we will set up a conference call for you to call into during the sale. Please call a few days in advance if this is needed so that we may set this up and get you the necessary phone number and information ahead of sale time.

SALE CONTACTS:

LIABILITY

All persons who attend the sale or view the cattle do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents that occur on the sale or viewing premises.

ACCOMMODATIONS:

Baker, Mont.

(If planning to stay please reserve early as the oil field activity can cause room shortages.)

Montana Motel 406-778-3315

Miles City, Mont.

Sleep Inn & Suites 406-232-3000

Miles City Inn & Suites 866-599-6674

TERMS

The terms of the sale are cash. All settlements will be made with clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on sale day take precedence over any statements printed in this catalog or advertisement.

DELIVERY

We will provide delivery up to 300 miles. Over 300 miles we will work with the buyer to make arrangements on delivery. **A \$100 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale.** Delivery of the bulls will start the week after the sale.

BULL HEALTH PROGRAM

The bulls received Vision 7 at branding and then were preconditioned in August with Bovishield Gold One Shot and Vision 7 Somnus. The bulls were boosted with Bovishield Gold in September. They received a Fusiguard injection in November and a booster in December. The lice prevention program consisted of injectable Dectomax and Permethrin CDS in November, Clean-Up II in December, and Clean-Up II in January. Semen evaluations were performed by Fallon County Vet Service prior to the sale and all the evaluation forms will be available sale day.

BULL DEVELOPMENT

The bulls are fed on a ration to develop them into sound, functional, useable bulls for big country. They are fed to gain 2.5 lbs per day. The ration consists of whole kernel corn (7.5 lbs), distillers grain (1.6 lbs), and a balance of 45% grass, 25% alfalfa, 30% Haybet Barley chopped hay mix along with a mineral supplement. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lb gain. They have been developed at Bruce & Eric Bowman's feedlot which is located 1 mile south of Rhame, N.D.

SEMEN INTEREST

Milk Creek Reds is retaining one-half revenue-sharing semen interest in all bulls in the sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale.

Sale Information

WATCH AND BID ONLINE AT DVAUCTION.COM

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
- Complete the process by filling out the Banking & Lending information requested.

Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.

If you would prefer to be approved using your credit card, call (402) 474-5557.

Please be sure to apply for bidding at least a day in advance of the sale—every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

RED ANGUS GUIDE TO EPDS

- HB** – HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** – GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** – Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** – Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** – Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)
- MILK** – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** – Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Ranch Tested. Rancher Trusted.

Red Angus

For more information, visit RedAngus.org.

Top Dollar Angus Feeder Program

Top Dollar Angus is a genetic-certification and marketing company focused exclusively on the top 25% of the industry in carcass and growth Angus and Red Angus-influenced feeder cattle. Top Dollar Angus is a program similar to other popular branded-beef programs, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market.

Qualified herds must have two or more generations of Angus (Black or Red) genetics with growth and carcass traits objectively ranking in the top 25% of the breed based on documented historical sire use. DNA evaluation, conducted by Zoetis or GeneSeek, is another workable method to qualify. Once your cattle have met the necessary requirements, they will be marketed under the Top Dollar Angus brand and logo, and will be promoted aggressively to a large number of feed yards and buyers. In today's market, Top Dollar Angus cattle are seeing premiums ranging from \$30 to \$70 per head above the average market.

Why the premium? Cattle feeders know that Top Dollar Angus cattle perform better and have higher grid-based carcass rewards compared to other cattle. This puts more dollars per head into the cattle feeder's pocket, which can be passed back to the producer in the form of premiums paid above market price.

Jared Wareham,
general manager
660-492-2777
jared@topdollarangus.com

Kacey Jacobson,
field representative
701-391-4646
kacey@topdollarangus.com

Top Dollar Angus helps take the guess work and surprises out of growing and feeding cattle. Feed yards are tired of unpredictable performance and wide-ranging profitability results from group to group on cattle they purchase. Cattle often look the same and have the same colored hides, but are very different genetically. That's why the genetic certification of high-end Angus and Red Angus feeder cattle is here! The industry must differentiate the best Angus and Red Angus genetics from average cattle, and that's what Top Dollar Angus will do for you!

If you have consistently invested in high-performance Angus or Red Angus genetics, Top Dollar Angus will make your cattle stand out from the pack and get you the premiums you deserve. No matter how you market your cattle, our goal is to create more demand and higher prices for your calves.

www.topdollarangus.com

THRIVE

**Position your ranch to thrive
with Red Angus-sired calves.**

Red Angus bulls unlock premiums by siring calves with a market advantage that buyers appreciate both in the feedlot and the replacement heifer pen.

Plus, the Feeder Calf Certification Program yellow tag adds another layer of price advantage through genetic, age and source verification. Thrive on sale day with Red Angus.

We are starting to calve our third crop of daughters out of 4304 and are very pleased with their fleshing ability, moderate size, feet and leg structure, and calving ease. The 4304 daughters are the largest sire group in our cow herd because of the ability of this sire to produce higher performance with good carcass and leave the right size and kind of females in the herd.

We used 6013 A.I. on both heifers and cows and then used him naturally on 52 2-year-old heifers where he held his flesh well and had only 3 open cows in his group. By using this bull hard we have recorded 65 progeny this past year and 66 progeny the previous year which allows us to determine his genetic merit within our herd. We are about to start calving his first daughters and they look to be the right kind of heifers.

Last year we saw a great demand for 3411 sons in the sale because of their performance, phenotype and carcass merit. In 2018 we decided to use another bull in our AI line up because we were using 3411 with a large group of cows cleanup. What we didn't know was our A.I. conception on those cows did very well and the cows that were left decided to have two thirds heifer calves. Long story short, this has left us with a very small offering on the 3411 sons for this sale. So, he was added back into the A.I. line up in 2019.

Firecracker is a full brother to the popular 5L Independence bull. Tena and I saw Firecracker at World West Sires and thought that he was moderate and offered good thickness for a calving ease bull. We used him A.I. on heifers and like the results. He offers calving ease with adequate growth and puts it in a package that offers the shape and muscle that we like.

The 2069 young females in our herd are the reason that we continue to use this sire. They are moderate, dark red, good footed with beautiful udders. We have used him cleanup on heifers for the first three breeding seasons and are using him on cows through A.I. as we sold him as a 5-year-old bull back to Sandbur Ridge Red Angus.

We purchased Redman in the Crowfoot dispersion in Canada because we really liked his dam and needed a calving ease bull. We continue to use Redman A.I. on heifers but moved him to cows for cleanup. We like the type of female that he is leaving in our herd and like this group of sons that have good shape and type.

Real Deal is another new A.I. sire that we used on cows. His progeny have more depth of rib and capacity than most other sires that we have used. They are soft made with above average performance and the females that we saw at 5L has us wanting to get as many females in production as we can.

Vigilante is a new A.I. sire that we used on both heifers and cows. The heifers bred to him calved easy and his progeny were above average for weaning and yearling ratios. We really like the moderate frame and shape that he puts in his progeny.

If you view many sale catalogs this spring you probably will come across Seneca in some reference sires lineup. He is a bull that you will probably see a lot more of in the future because of the moderate frame, depth and thickness that he consistently puts in his offspring. We sampled Seneca after seeing him at World West sires and visiting with Jordan Rhodes who raised the bull.

9127 is our standby heifer bull that we find ways to use whenever we can to get more daughters in our herd. He sires calving ease with more depth of rib and thickness that most calving ease sires and leaves you with very functional easy fleshing cows. People that come to the ranch appreciate his older working females.

Double Play was another 2018 selection from the 5L program that we have used on our two year old heifers. His pedigree is unique being sired by the popular 5L Blockade out of his own dam the great Opal cow. His first progeny have indexed 100 at both weaning and yearling which is right where we want him to be.

Malbec is our first sample of genetics from the U2 program in Alberta that had a tremendous female factory that has been dispersed throughout North and South America in their historic sale last fall. We used Malbec in a couple of flushes and are pleased with his offspring. We will be offering more of U2 genetics in the future.

Robert F. Neumann • Nov. 1, 1925 – Jan. 21, 2020

As we transition through life, just as each season transitions to the next in a year, we all hope that we can do it tastefully. Bob was a man that exemplified this well. Bob and Stanley (Bruce's Dad) were good buddies that shared many bachelor days together. Throughout the years, Bob became a mentor, a friend, a father figure, and most importantly a part of our family. The four of us were blessed to share the seasonal events written to the side with him throughout his and our years. As he walked through life, he greeted every season of life with grace. Bob's life was well lived. He set an example that Bruce and I can only hope to follow. †

**Spring has come
Crocuses will bloom
'Tators will get planted
The first tour of the hills will be made
Cattle will be trailed**

**Summer is here
Hay will be cut
Water will be checked
Weeds will be sprayed
Windmills will be scaled**

**Fall is in the air
Berries will be picked
Cows will be preg tested
Calves will be weaned
Hunters will be coming**

**Winter has arrived
Snow will fall
Cattle will get fed
Creatures will den up
And we wait ... for the return of Spring.**

We are pleased with our first Vigilante sons that we are offering. Lot 1 (9201) leads this group in that he is balanced from birth to weaning to yearling and brings along a good ultrasound package as well. His dam is an 8-year-old Express 9141 daughter that we are currently flushing. She is moderate, deep, good footed and uddered. She posts a 103 MPPA with a 96 birth weight ratio and a 103 weaning weight ratio. The challenge with this bull is determining if you want to use him on cows or heifers.

Lot 5 (9215) seems to have a way of being discovered in this pen of bulls because of his moderate, tanky appearance. He carries as much red meat in a compact package as you will see in this offering.

Lot 7's (9226) dam was stifled during A.I. season this past spring which created a challenge for her to get around. In our 2016 sale, her son was the high-selling bull going to Ole Farms in Alberta. 9226 made up for his dam's lameness after he was weaned, posting one of the highest gain ratios.

This Vigilante son might get over looked when you study his performance. His actual birth data combined with his CED and BW EPDs suggest that he could be used on heifers. His dam has had 5 natural calves with a 95 average birth weight ratio also indicating the calving ease. She is also the dam of the ET calves in Lots 17, 40 and 44.

We all know that there is not a perfect bull so we hope that we can find a few that check a majority of the boxes for the traits we like. If your boxes include phenotype, performance and carcass backed up by a fertile, functional, productive cow, Lot 9 (9206) might be worth looking at. He posted a 119 weaning ratio, 116 yearling ratio, 164 marbling ratio, 111 REA ratio, and is produced by a dam with a 107 MPPA on 8 progeny in a 363-day calving interval. If you study numbers, Lot 9 (9206) has 8 traits or indices that are in the top 6% of the breed.

We used Vigilante on heifers for his calving ease and he delivered what we were asking him to do but we didn't expect to see the performance that he delivered when we mated him to cows. Lot 11 (9208) was produced by a 5-year-old Redstone daughter that has never missed, producing four sons that have all been above-average performance no matter what she was mated to. He brings strong ratios to consider: 120 weaning weight, 111 yearling weight, 141 marbling, 100 REA, and backed by a dam with a 108 MPPA with a 363-day calving interval.

Lot 15 (9234) brings the combined above-average growth and carcass ratios that seem to be more of the norm for his sire in this year's offering. His 107 and 108 weaning and yearling ratios followed by his 116 IMF and 107 REA ratios would allow him to be considered for making great feeder calves. His Admiral dam brings a moderate, deep, soft-made profile that we seek for our females.

Lot 18 (9239) should work well on heifers. When you study his birth weight, Birth EPD and CED rankings followed by studying his pedigree, you could conclude that he works well on paper for a potential heifer bull candidate. When you look at him, he carries that smooth shoulder that would complement what the paper states.

This black red gene carrier Firecracker son does a lot of things well. He started out with a 73 pound birth weight and converted that into a 111 weaning ratio. He also brings a 113 and 115 IMF and REA ultrasound ratio along for good measure. His red granddam came to us in utero through the Crowfoot dispersal in Canada. She was bred to a black red gene carrier sire and the result was a black heifer. That black cow and her daughter are our only two black cows. If they had some flaws we would move past them, but they are both quite good.

If you study some of these bulls out of first-calf heifers you will find that there are a number of 3/4 brothers combining the Firecracker with Advocate daughters. This combination as in Lot 25 (9292), tends to give an animal that comes in low at birth and above average in the growth categories and still brings some carcass ultrasound merit.

This ET Seneca son should produce the replacement females that most cattle producers look for. Four generations of his maternal pedigree consists of deep-ribbed, easy-fleshing cows that had good feet and udders along with longevity as a bonus.

Steward 9224 is another Advocate son that combines good growth ratios with well-above-average marbling and ribeye ratios. This might be due the breeding of a half-brother to a half-sister and stacking the carcass and growth together. His dam has a 104 MPPA and is a moderate-framed, good-uddered cow.

Multiple generations of cow-making genetics are stacked into Lot 53's (9247) pedigree. His 11-year-old Red Knight dam is as nice as you can make a cow. She starts with good feet and udder quality followed by additional length and is very feminine. He also has the beef side of the equation covered with decent carcass and growth being expressed.

Express 9127 still brings relevant traits to our program at 11 years past his birthdate. We continue to use him on heifers because he produces moderate birthweight cattle with more depth and thickness while leaving us with great females. 9284 also brings one of the highest marblings scores out of the first-calf heifer group.

Lot 59 (9293) offers three generations of sires that we have used on heifers over the years as well as good birth weight data backed by EPDs as indicators of the potential in this heifer bull candidate. He also exhibits above-average growth and marbling ratios with an added shape and depth that makes him easy to look at.

We really like our Legend 2069 daughters that we have in production. They are moderate and have very good udders and are making very productive young cows. Lot 94 (9340) takes the traits of his dam a step further by adding the complementing package that Provision provides with added length and balanced performance.

Provision offers a balance of moderate birth with decent growth in his progeny. We have used him on both cows and heifers and are pleased with his moderate birth weights. Lot 95's (9346) dam is an 11-year-old Guliaini daughter that has proven her performance with a 103 MPPA while calving on time and exhibiting the functional feet and udder characteristics that we appreciate.
