DELIVERY:

\$75.00 credit on a future sale if you haul your bull(s) home sale day. Free delivery on all bulls within 300-mile radius of Philip. After 300 miles, delivery at cost.

GUARANTEE:

All bulls guaranteed for soundness, fertility and will have passed a breeding exam. All Angus bulls will be 50Kd.

BREEDING SEASON GUARANTEE:

All bulls selling for \$3,000 or more will be covered 50% by Slovek Ranch if they are injured during their first breeding season. Breeding season is defined as the 60-day period (not to exceed September 1, 2019) following the first turnout of the bull. Buyer keeps all salvage value and will receive credit at future sales for the difference between the purchase price and salvage value. Please notify us as soon as possible if injury should occur and prior to the injured bull being sold. All injured bulls must be identified and diagnosed by a veterinarian and claims made before September 1, 2019.

Example A: A \$5,000 bull is injured and will not heal and is sold for \$1,000. The buyer will keep the \$1,000 and receive \$2,000 credit.

Example B: A \$2,400 bull is injured and will not heal. No credit is given. Buyer retains all salvage.

This does not cover mismanagement or neglect.

RETAINING INTEREST:

Slovek Ranch retains the right to collect semen on every bull at our cost and at buyer's convenience. Full possession and full salvage value sells on all bulls.

VOLUME DISCOUNT:

We will be offering a volume discount credit for future sales. You pay what you bid and credit for future sales will be as follows:

- 1% of purchase price of 3rd bull
- 2% of purchase price of 4th bull
- 3% of purchase price of 5th bull
- 4% of purchase price of 6th bull
- 5% of purchase price of 7th bull
- 6% of purchase price of 8th bull
- 7% of purchase price of 9th bull
- 8% of purchase price of 10th or more bulls

www.rpipromotions.com

Dear Cattle Producers,

Welcome to our annual production sale. This year, we are offering 31 registered Angus bulls and 22 composite/hybrid bulls.

On October 24th the bulls were fertility tested, tric tested, wormed, and given breeding and foot rot shots. The scrotal measurements listed in the catalog are their actual scores on this date.

Again we are offering a set of 50 commercial bred heifers. They are bred to calving ease sons of Sydgen Fate and PA Fortitude, that we raised. They are due to calve, April 1st, 2019 for 20 days. Due to the shorter gestation of these genetics we have experienced, you could see calves as early as March 20th.

If you have any questions or want to stop by give us a call, Bill 605-457-2311 or cell 605-685-3588 and Bo 605-457-2003 or cell 605-454-8124. Directions from Philip are ten miles north on Highway 73 to Ten Mile Road. Nine miles west to the T, one mile north to Slovek Rd. and then three miles west.

Sincerely,

Bill & Bo

Bo, Belinda, Blane, Brandon, Bryler, Penny & Bill

Brock, Ashley
& Mila

**BS Lady Y88 – Reg: AAA #17158202**

You will see alot of Angus and SimAngus bulls out of Y88 in the years to come.

— \$PROFIT™ —**Why \$Profit:**

Today, ranchers have to make proper genetic decisions to improve profitability and the return on their investment. However, most seedstock providers confuse potential customers with too many EPDs. Most Angus have over 25 EPDs plus DNA rankings are also often provided. While this data is useful, it is also very hard to analyze. This makes buying the best bull very difficult. Every bull is good on some traits and weak on others. The challenge is figuring out how each of those traits is going to impact your bottom line. Buyers try to determine which bull will make the most money from birth to slaughter, but most of the time, they end up guessing.

How \$Profit works:

\$Profit assumes that the average commercial bull will have 100 progeny over its lifetime. The model assumes that you keep 30% of your heifers as replacements and that you retain ownership on the remainder of the calves through harvest. Further, it assumes that you will sell on a grid with premiums for quality grade and yield grade.

Most importantly, \$Profit allows you to easily compare any two bulls and calculate the difference in profit that they are expected to generate in your herd. Let's compare a \$14,000 \$Profit bull to \$10,000 \$Profit bull. The predicted difference between the bulls is \$4,000 or about \$40 per calf. For comparison, the average 2015 Angus bull has a \$Profit of approximately \$9000.

What traits are included in \$Profit:

\$Profit includes nearly every trait that impacts profitability. The effect of most traits on profit is fairly simple to understand. Here is the list of what is included and its effect:

Revenue Traits

Calving ease = more calves means more revenue.

Weaning & yearling EPD = more weight equals more revue.
Fertility (days to conception) = more weight and more calves
Carcass weight = worth more up to 477 kg.
Marbling = valued based on grid premiums
Ribeye area = value as impacts yield grade
% Retail Product = more yield is more saleable meat

Cost Traits

Cow mature size = bigger eats & costs more
Cow intake = more intake eats & costs more
Feedlot feed efficiency = more feed per kg of gain means more cost
Some traits are not so easily characterized for \$Profit. Milk, for example, is a good thing until you get too much. When over +25, milk EPD has a more negative effect on fertility than it has a positive effect on weaning weight. There are a few traits not yet included in \$Profit: longevity, structure, and disposition. These traits are important but difficult to express in dollars.

ABC EPDs = All Breeds Comparison

Over one million animals in the system which includes all major breeds. They are based off of black Angus EPDs.

\$Ranch (combines the following) = CE, CED, BW, WW, Cow Cost/Feed Efficiency, & Fertility + selling calves of cow in fall feeder

\$Feeder = starts where the \$Ranch quits and combines these EPDs YW, ADG, RADG, Feed Efficiency, IMF, Ribeye, & YG

%Rank = shows how they rank among other animals in the database.

0.1% = This bull is in the top 0.1% of all animals in the data base.

10% = This bull is in the top 10% of all animals in the database
