INSPECTION OF CATTLE

The cattle will be available for inspection at the sale site on Thursday. Prior to this, visitors are welcome anytime at the Feiring Ranch or Sheldon feedlot where Ash Coulee Ranch bulls are being fed.

ABSENTEE BIDS

Anyone who cannot attend the sale may place phone or mail bids to the auctioneer, one of the ring men, Doug Feiring, or Scott Davis. Bids will be handled as if you are present. Sight Unseen Guarantee.

TERMS AND CONDITIONS

We will conduct this sale under the suggested sale terms and conditions adopted by the American Angus Association.

HEALTH

Health and brand papers will be furnished. All cattle have been for IBR, Pi3, BVD, Pasturella, Haemophilus Somnus and poured with Vettricmec. All females have been bangs vaccinated for brucellosis and will be vaccinated with PreGuard 10 FP before the sale. All bulls have been vaccinated with PreGuard 10 FP and Fusogard (footrot vaccine) so their ready to work for you.

EPDS AND FINAL PERFORMANCE DATA

Current EPDs are used whenever possible. Please note that EPDs may change from the time the catalog is printed until the registration papers are transferred. Performance information will be available on and before sale day.

ULTRASOUND CARCASS DATA

JJ Hovde, AAACUP certified technician, has ultrasounded all bulls for marbling, rib eye, back and rump fat. Results will be available on website or sale day.

ANNOUNCEMENTS

Announcements from the auction block will take precedence over information in the catalog.

INSURANCE

Insurance will be available through Bill Pelton.

DELIVERY

\$50.00 off per bull/picked up sale day. Or Free delivery on bull(s) within 250 miles radius. After 250 miles, we meet you or drop off at a central location point (sale barn, vet clinic or?) that has been agreed on to be a central location point by all parties.

FEEDING ARRANGEMENTS

We can board you bull(s) till you need them. Feiring bull(s) will remain at Feiring Angus Ranch. Ash Coulee bull(s) will be taking back to Sheldon Feedlot and cared for them there. There will be a \$2.00 per head/per day charge with this service. And you will be responsible for picking up the bull(s) at either place, unless prior arrangements have been made.

OUR GUARANTEE

To our knowledge, these bulls are fertile and have passed a breeding soundness exam and are guaranteed for the first breeding season (60 days) which begins when you turn out the bull(s). The semen test conducted by a licensed veterinarian consisted of both an internal and external exam. Scores were derived from scrotal measurement and microscope examinations to determine the motility and morphology of the sperm.

If a bull fails to settle cows or heifers, assuming he is in good condition and not injured, we will provide you with a satisfactory replacement if available. If a replacement is not available, we will issue you credit equal to your purchase price minus the salvage value that may be used towards the purchase of any animal for sale through our annual production sale or private treaty. We must be notified immediately and before selling the infertile bull in question. We also reserve the right to a second opinion from a veterinarian of our choice and 60 days to determine if the bull is infertile. This guarantee is to ensure the bull's fertility only.

LIABILITY

Everyone attending this bull sale does so at his or her own risk. Neither Feiring Angus nor Ash Coulee Ranch assumes liability, legal responsibility for any accidents, or for the behavior of animals.

RETAINING INTEREST

Feiring Angus Ranch and Ash Coulee Ranch is retaining one-third revenue sharing semen interest in every bull selling in this sale. Full possession and full salvage value sells on all bulls. Unless stated otherwise from the Auction Block. We also reserve the right to collect semen on any bull selling in this sale, at your convenience and our expense, to be used in our herds only.

Catalog designed by

Emily Brinkman, owner/designer

Welcome Friends & Cattlemen.

We would like to invite to to our 24th Annual Sale. Thank-you to all past customers, inquiries, & for choosing us for you seed stock needs. Without you we would not have made it in this business for 4 Generations & 63 years! You are always welcome to stop by the ranch anytime & look through our cattle and operation. Just call ahead so we're home.

I know how busy this time of year gets. We've videoed this year's offering again, and you may view them at billpelton.com or come look at the cattle before the sale. Remember these videos were taken over a month ago and the bulls will be more impressive sale day! The cattle will not run through the ring, we have a video playing of each lot in the sale. The cattle are penned outside in groups for your inspection. We also have a conference phone set up so you can call in, listen, & bid that way. You can call us with your needs & we'll do our best to accommodate you! We offer a 100% sight on seen guarantee, a 30 day disposition guarantee, 3 year foot guarantee, & a first year breeding fertility guarantee. We ask that you contact us before you cull any animal.

We've hand fed these bulls again this year. They were weaned on grass hay the first of Nov. for 30 days and then we started feeding the a high fiber/lower energy pellet (.42 magical) once a day, always having access to free choice grass hay in ring feeders. We culled hard on disposition, these are the top 1/3 of mates. All were range calved, born unassisted & born in the first cycle of calving. These Yearling bulls are young with the oldest being just a year of age by sale day. Our gains are modest, but most will weight over a 1000 lbs by a year of age. Yes, they could be fed more and be more impressive on sale day, but my # 1 priority is to sell you a fertile, sound bull that will get you the most cows bred in 30 days! Do you remember gym class when you were in school and told to run!! Most that screamed to stop were the overweight ones. No, different with bulls!

We've added 2 new sire groups this year. We searched for cattle that will produce the most pounds per acre in a low input, harsh environment. Fairview Bardolene 4235 is an outcross bull from old Canadian genetics, known for foot structure, muscle, design, maternal excellence, masculinity, carcass quality, and hair coat. Citadel of Saddle Butte 47/15 (547) came from Saddle Butte Ranch in Montana. Where they bought him as an imported embryo from Sinclair Cattle Co. He stems from the quest of preservation of the 150 year old genetics that started the Aberdeen Angus breed...This sire group will re-enter the goodness of old- time Angus where cattle perform in real world environment (grass only) to produce the most pounds per acre.

Our goal is to produce bulls that work for the commercial cattlemen in the real world. If you want bulls with structural correctness, natural fleshing ability, and backed by a superior cow look no further. With the influence of the OHDLE (O C C) genetics, setting this offering apart from the rest & makes them unique. We've continued to stack genetics of the same type & kind to create an animal that is fertile, predictable, has longevity, and returns the most profit /acre. Where less is more!

If we can be of any assistance to you please let us know! Thank-you for taking time to view the catalog. A sincere Thank-You to all who help with sale & all year long! We look forward to seeing you on April 21st.

THANK-YOU & GOD BLESS!
Doug & Ceylon Feiring Family

COMMERCIAL HEIFERS

General information on the commercial heifer offering:

- Heifers are penned by size and type.
- Heifers tag color indicates consignor, 1 through how many consigned.
- Heifers will be penned and displayed in uniform lots. Heifers will also sell with videos on TV's and not brought through the ring on sale day.
- Each pen will have consecutive numbers (tags) 1-20, 20-40, etc.

- Winning bidder has choice of 5 head or more, if they take 10 head they get the lowest numbers in pen (1-10), and then the bidding starts again on the remaining pen, or they can take the whole pen and have the option to take remaining heifers (pen or pens) by that consignor at their bid price.
- If you have questions please contact Doug Feiring, 701-629-1912

70 COMMERCIAL HEIFERS

20 RED ANGUS & 50 BLACK HEIFERS

Feiring Angus Ranch

- Replacement heifers selected from our registered and commercial cowherds.
- Born April and May 2017
- Sired by Feiring reference sires and Feiring raised bulls.
- Bangs vaccinated and freeze branded

- Outstanding brood cow prospects. Optimum size and very uniform in length, volume and structural correctness.
- Weaned on grass hay until mid-January, then started on feed, 5 lbs. of high fiber/lower energy pellet per/day and free choice grass hay.

# OF HEAD	BUYER	PRICE

# OF HEAD	BUYER	PRICE

70 COMMERCIAL HEIFERS

35 BLACK ANGUS HEIFERS & 35 BLACK BALDIES

Chuck & Roberta Ramberg & Katie Bearce

- Born March - May 2017
- Bangs vaccinated
- Freeze branded
- Breeding preg-guard shot

- Wintered on grass hay, 3 lbs. of pellets per/head/day
- Docile and easy to manage heifers that will make excellent mothers.

THE GENETIC PARADOX

By Jared Wareham | Printed in Drovers Magazine July 2017

Throughout human existence it has been our nature to push the envelope. More speed. More power. More performance. Ingenuity combined with trial and error spawn new peaks in technology.

As we strive to stay ahead of the technological advancement curve, we sometimes forget about the interconnected systems that might need time and adjustment to catch up. Too much torque and the transmissions or drivelines wear out easily. Increases in output translate into greater input requirements and higher priced fuels. At some point, the law of diminishing returns kicks in, making that next increase to performance or production too costly and economically inefficient. Much of the same can be said of beef genetics.

It is amazing how much progress our industry has made in genomics in such little time. Genetic improvement is absolutely vital for every segment of our industry because it helps promote multiple elements linked to sustainability. However, producers need to be mindful of the inevitable trade-off that comes with a rapidly accelerated discovery curve.

Decades ago, the push for performance was inadvertently tied to frame. Mature size and calving difficulties almost singlehandedly devastated the marketability of many breeds. Though unintended, the consequences were still significant. It is no different than the push for muscle cars with powerful stances and large throaty motors that also guzzled fuel by the gallon.

Oddly enough, we have corrected cow size, yet cow maintenance or input cost remains a common issue. If you install a

high performance racing engine in a car, it will require a grade of fuel of equal magnitude to perform up to it's potential. Cheap, poor quality fuels simply won't do. The same is true for your cowherd. If you continue to select for growth and milk genetics, be prepared to adjust the feed input requirements that will follow. Our push to discover that next elite genetic package is changing the beef herd from independent foragers to concentrate dependents.

There are other phenotypic systems that desperately need to catch up with a hastily advancing genotype population. Evidence of this can be seen in the national beef herd by simply looking at their feet. The push to discover cattle that can be marketed as the next top genetic package for extreme calving ease, growth and marbling, is creating a significant gap in animal soundness. As technology continues to expedite the genetic discovery process, this gap might only get bigger.

Unintended consequences, arise under the strain of scientific and economic achievement. It will take time and discipline to bring traits like soundness up to speed.

I am by no means making an argument against genetic advancement. On the contrary, I am a firm believer in improvement and making wise use of all genetic selection tools. I simply see the road to change is not straight and narrow. It winds and turns with plenty of peaks and valleys, as well as, the occasional switch back. As a breeder, you need to understand the trade-offs that come with accelerated genetic selection. Can you afford to add that next unit of performance or milk? Or, should you keep pace just behind the curve and capture value as the rest of the systems catch up?

“
As a breeder you need to understand the trade-offs that come with accelerated genetic selection.

OUR BULL GUARANTEE

At Feiring Angus Ranch we have always been prepared to guarantee our bulls. The guarantee is structured to cover fertility and soundness. All bulls selling have passed a breeding soundness exam by a licensed veterinarian and screened for soundness.

We will guarantee bulls from the date of purchase against loss of fertility or soundness not caused by physical damage. This is a guarantee to protect the buyer against any problems with bad feed, hooves, structural problems and/or the inability to settle a cow. When breeding for 3 years pro-rated in the form of a credit in the next available Feiring Angus Ranch sale, or if we have a satisfactory replacement on hand for a trade or a partial credit on a different bull. This guarantee does not cover injuries such as stifle, broken bones, broken penis, bruises from fighting, foot rot, frozen or bruised testicles, poor or over condition, unsound management practices, or disease. The guarantee only covers the value of the bull, not the loss of production. A veterinary certificate is required to warrant this guarantee and we reserve the right of a second opinion. Any associated costs are that of the purchaser. Sound management practices are expected (fertility testing annually and checks that bulls are working while mating are mandatory).

Purchaser can extend their protection further by insuring their bull(s) for transit and full mortality risk. Being death by accident, disease, and including the peril loss of use by accident. This coverage will be at the buyer's cost.

Your cost of the bull, minus the salvage value will be covered by a 3 year pro-rate guarantee in the form of a credit in the next available Feiring Angus Ranch Bull Sale, or if we have a satisfactory replacement on hand for a trade or a partial credit on a different bull. This means that if the bull breaks down:

- During the first mating, 100% of the credit applies
- After the first or during the second mating, 67% of the credit applies
- After the second or during the third mating, 33% of the credit applies
- After the third, one of the credit applies

THANK YOU FOR ATTENDING OUR 24TH ANNUAL SALE!

ASH COULEE RANCH

We'll come to the Feiring Angus and Ash Coulee Ranch Sale. We value the interest you have placed in our programs and are excited to offer another strong set of bulls and replacement heifers. The Ash Coulee offering of bulls are the top cut of 69 bulls born this year. Also we are offering 5 two year old bulls that were kept for our own use but due to a herd reduction are now for sale. We may use semen from these bulls later on.

Ash Coulee Ranch strives to produce problem free cattle sired by some of the best bulls genetically designed to produce a balance of economical traits so needed in this part of the country. How would you like to produce problem free cattle? Never have to assist in a birth, have all healthy needle proof cows or have to cull for disposition. Cows that breed easy, mother their calves and wean a large percent of their body weight, fit their environment and don't need extra feed input. How much more profitable could we become? Perfection is never achieved but excellence can be. Ash Coulee has been striving to achieve these goals for over 50 years.

I would like to pay tribute to some of the cows that have contributed to these goals. Of course the most popular Ash Coulee bred cow would be A C Duke Girl 57. After a great productive life at SAV she sold for \$53,000 to Payne Angus Ranch in Oklahoma where her daughter, a full sister to the record weaning weight producing cow at SAV sold for \$20,000. A C Duke Girls dam, A C Duke Girl 330 is still producing at 15 years of age and is a current pathfinder cow. She has weaned 9728 pounds of calf

(no Creep) and is working on her next one. We have 2 other 15 year old cow that are over 9000 pound producers as well. There are several 4 ton plus producers still with us at Ash Coulee but the record holder is Ash Coulee Ever Glory 46 who produced 18 calves at 19 years of age with a weaning ratio of 102 and weaned 11,188 pounds of calf. We used 3 sons of her in the herd. The traits that make the cowman the most money are (1 Fertility: (2 Maternal: which includes calving ease, mothering ability, udder quality, longevity, disposition, intelligence and the ability to forage and breed back. (wow there is a whole lot there) Fertility and maternal will make commercial cattlemen the most money. (3 Growth and Carcass follow that. Balance is the key for cattle production and always has been. Too much of any trait will not pay the bills.

We would like to thank our friends the Feiring's for the hard work they put into this sale. A special thanks goes out to all interested in our genetics. Your the reason we have been able to provide seed stock for 50 plus years. Thanks also to all the hard working friends and family that help make the sale a success.
